

SUMMARY PROSPECTUS SUPPLEMENT

**NORTHERN FUNDS

**SUPPLEMENT DATED OCTOBER 26, 2011 TO
SUMMARY PROSPECTUS DATED JULY 31, 2011**

Northern Trust Investments, Inc. is scheduled to increase the expense reimbursement it provides to the Multi-Manager Mid Cap Fund effective as of January 1, 2012. This increase in expense reimbursement will have the effect of reducing the Total Annual Fund Operating Expenses paid by investors. The following chart illustrates the increase in expense reimbursement:

Fund	Total Annual Fund Operating Expenses After Expense Reimbursement	Operating Expense Reduction	Total Annual Fund Operating Expenses After Expense Reimbursement Effective 1/1/2012
Multi-Manager Mid Cap	1.20%	-0.10%	1.10%

The new contractual expense reimbursement arrangement is expected to continue from implementation until at least December 31, 2012.

EXAMPLE

The following Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$122	\$381	\$660	\$1,455

PORTFOLIO TURNOVER. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes

when Fund shares are held in a taxable account. These costs, which are not reflected in annual portfolio operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 62.29% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

In seeking long-term capital appreciation, the Fund will invest, under normal circumstances, at least 80% of its net assets in equity securities of medium capitalization companies. Medium capitalization companies generally are considered to be those whose market capitalization is, at the time the Fund makes an investment, generally within the range of the market capitalization of companies in the Russell Midcap® Index. Companies whose capitalization no longer meets this definition after purchase may continue to be considered medium capitalization companies. As of June 30, 2011, the market capitalization of the companies in the Russell Midcap Index was between \$382.9 million and \$17.81 billion. The size of companies in the Russell Midcap® Index changes with market conditions. In addition, changes to the composition of the Index can change the market capitalization range of companies in the Index. The Fund is not limited to the stocks included in the Russell Midcap® Index and may invest in other stocks that meet the criteria discussed below.

The Fund utilizes a "multi-manager" approach whereby the Fund's assets are allocated to one or more sub-advisers, at percentages determined at the discretion of the Investment Advisers. Each sub-adviser acts independently from the others and utilizes its own distinct investment style in selecting securities. However, each sub-adviser must operate within the constraints of the Fund's investment objective, strategies and restrictions. The Fund utilizes two principal styles intended to complement each other:

- *Value style* whereby the sub-advisers seek to identify companies whose improving businesses are not fully recognized by the market and whose securities are thus selling at valuations less than should be expected.
- *Growth style* whereby the sub-advisers seek to identify companies that are exhibiting rapid growth in their businesses.

When determining the allocations and reallocations to sub-advisers, the Investment Advisers will consider a variety of factors, including but not limited to the sub-adviser's style, historical performance, and the characteristics of each sub-adviser's allocated assets (including capitalization, growth and profitability measures, valuation metrics, economic sector exposures, and earnings and volatility statistics). The Investment Advisers seek, through their selection of sub-advisers and their allocation determinations, to reduce portfolio volatility and provide an attractive combination of risk and return for the Fund.

The Fund may make significant investments in initial public offerings ("IPOs").

The sub-advisers may engage in active trading, and will not consider portfolio turnover a limiting factor in making decisions for the Fund.

Frank Russell & Company does not endorse any of the securities in the Russell Midcap Index. It is not a sponsor of the Multi-Manager Mid Cap Fund and is not affiliated with the Fund in any way.

PRINCIPAL RISKS

MARKET RISK is the risk that the value of equity securities owned by the Fund may decline, at times sharply and unpredictably, because of economic changes or other events that affect individual issuers or large portions of the market. It includes the risk that a particular style of investing, such as growth or value, may underperform the market generally.

MANAGEMENT RISK is the risk that a strategy used by the investment management team may fail to produce the intended results.

MULTI-MANAGER RISK is the risk that the sub-advisers' investment styles will not always be complementary, which could affect the performance of the Fund.

MID CAP STOCK RISK is the risk that stocks of mid-sized companies may be subject to more abrupt or erratic market movements than stocks of larger, more established companies. Mid-sized companies may have limited product lines or financial resources, and may be dependent upon a particular niche of the market.

IPO RISK is the risk that the market value of shares of IPOs will fluctuate considerably or decline shortly after the IPO, due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about the issuer.

SECTOR RISK is the risk that companies in similar businesses may be similarly affected by particular economic or market events, which may, in certain circumstances, cause the value of securities of all companies in a particular sector of the market to decrease. While the Fund may not concentrate in any one industry, the Fund may invest without limitation in a particular market sector.

As with any mutual fund, it is possible to lose money on an investment in the Fund. An investment in the Fund is not a deposit of any bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation, any other government agency, or The Northern Trust Company, its affiliates, subsidiaries or any other bank.

Distributions may be taxable upon withdrawal from tax-deferred accounts.

PAYMENTS TO BROKERS-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's Web site for more information.
